

Characteristics:

- **soft, high quality PVC**, resistant to chemical products, UV rays, insulating, comfortable and available in a wide range of colours;
- **anti-slip surface** (DIN-certified) specially designed for wet environments such as **swimming pools, dressing rooms and shower facilities**, as well as gazebos verandas, gyms and paddocks;
- the safest, most hygienic and ideal solution for barefoot traffic areas thanks to its **anti-bacterial and fungicidal additive action** .

Each tile **measures 333 x 333 mm. – therefore nine pieces are enough to cover 1 m².**

The total thickness is 14 mm. and thanks to its underlying 256 feet it remains raised above the underlying floor surface, allowing water to drain and favouring the elimination of fungi and bacteria. **Weight: 4.3 Kg. per m².**

GRIP-DECK is easy to install thanks to its special hooking system and it does not require the assistance of specialised personnel. **GRIP-DECK can be rolled up.**
