

Swimming Pool Gratings: Depa, the specialist!

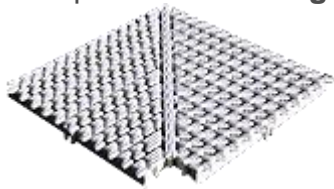

Characteristics of the grating with elements perpendicular to the edge of the pool:

- **height 25 mm. and height 20 mm. NEW!**
- **4 standard widths 180, 200, 250 and 300 mm. with 25 mm. of thickness and a new grating 295 mm. wide and 20 mm. high;**
- Supplied pre-assembled in sections **1 m. in length** (considerably reducing installation time);
- **various colours** (see the colour table). Minimum order quantity for colours other than white: 100 metres. Special colours: upon request.
- supplied with herringbone **corners** (upon request).
- High quality PP for a long life
- Provide Safe and **Hygiene** walking grating
- Simple handling and cleaning
- Special for residential and commercial pools

The structure and reinforced slats ensure an extremely high weight load capacity.
Manufactured in PP:

- **anti-UV additive:** prevents plastic from yellowing caused by sunlight;
- **anti-shock additive:** guarantees greater impact resistance;
- **free of cadmium and lead.**

The high specific gravity of the raw materials **prevents the grating from yellowing.** Certified to be **anti-slip** in compliance with DIN 51097 standards.
Complete with **herringbone corners**, on request:
